**DEFINITIONS:**  
**Common:** Resident or seasonally abundant species that will be seen during most visits  
**Uncommon:** Species regularly present in either low density or only in particular habitats, not likely to be seen on every visit  
**Occasional:** Species likely present in most years, but might not be detected annually  
**Rare:** Species found less than annually, fewer than 20 all-time records.  
**Species of Concern:** Species identified by the state of Oregon as "endangered," "threatened," "sensitive," or "sensitive critical for the Willamette Valley, including Sauvie Island."
